

# MODULAR BUILDINGS

*Modular is the new black.*

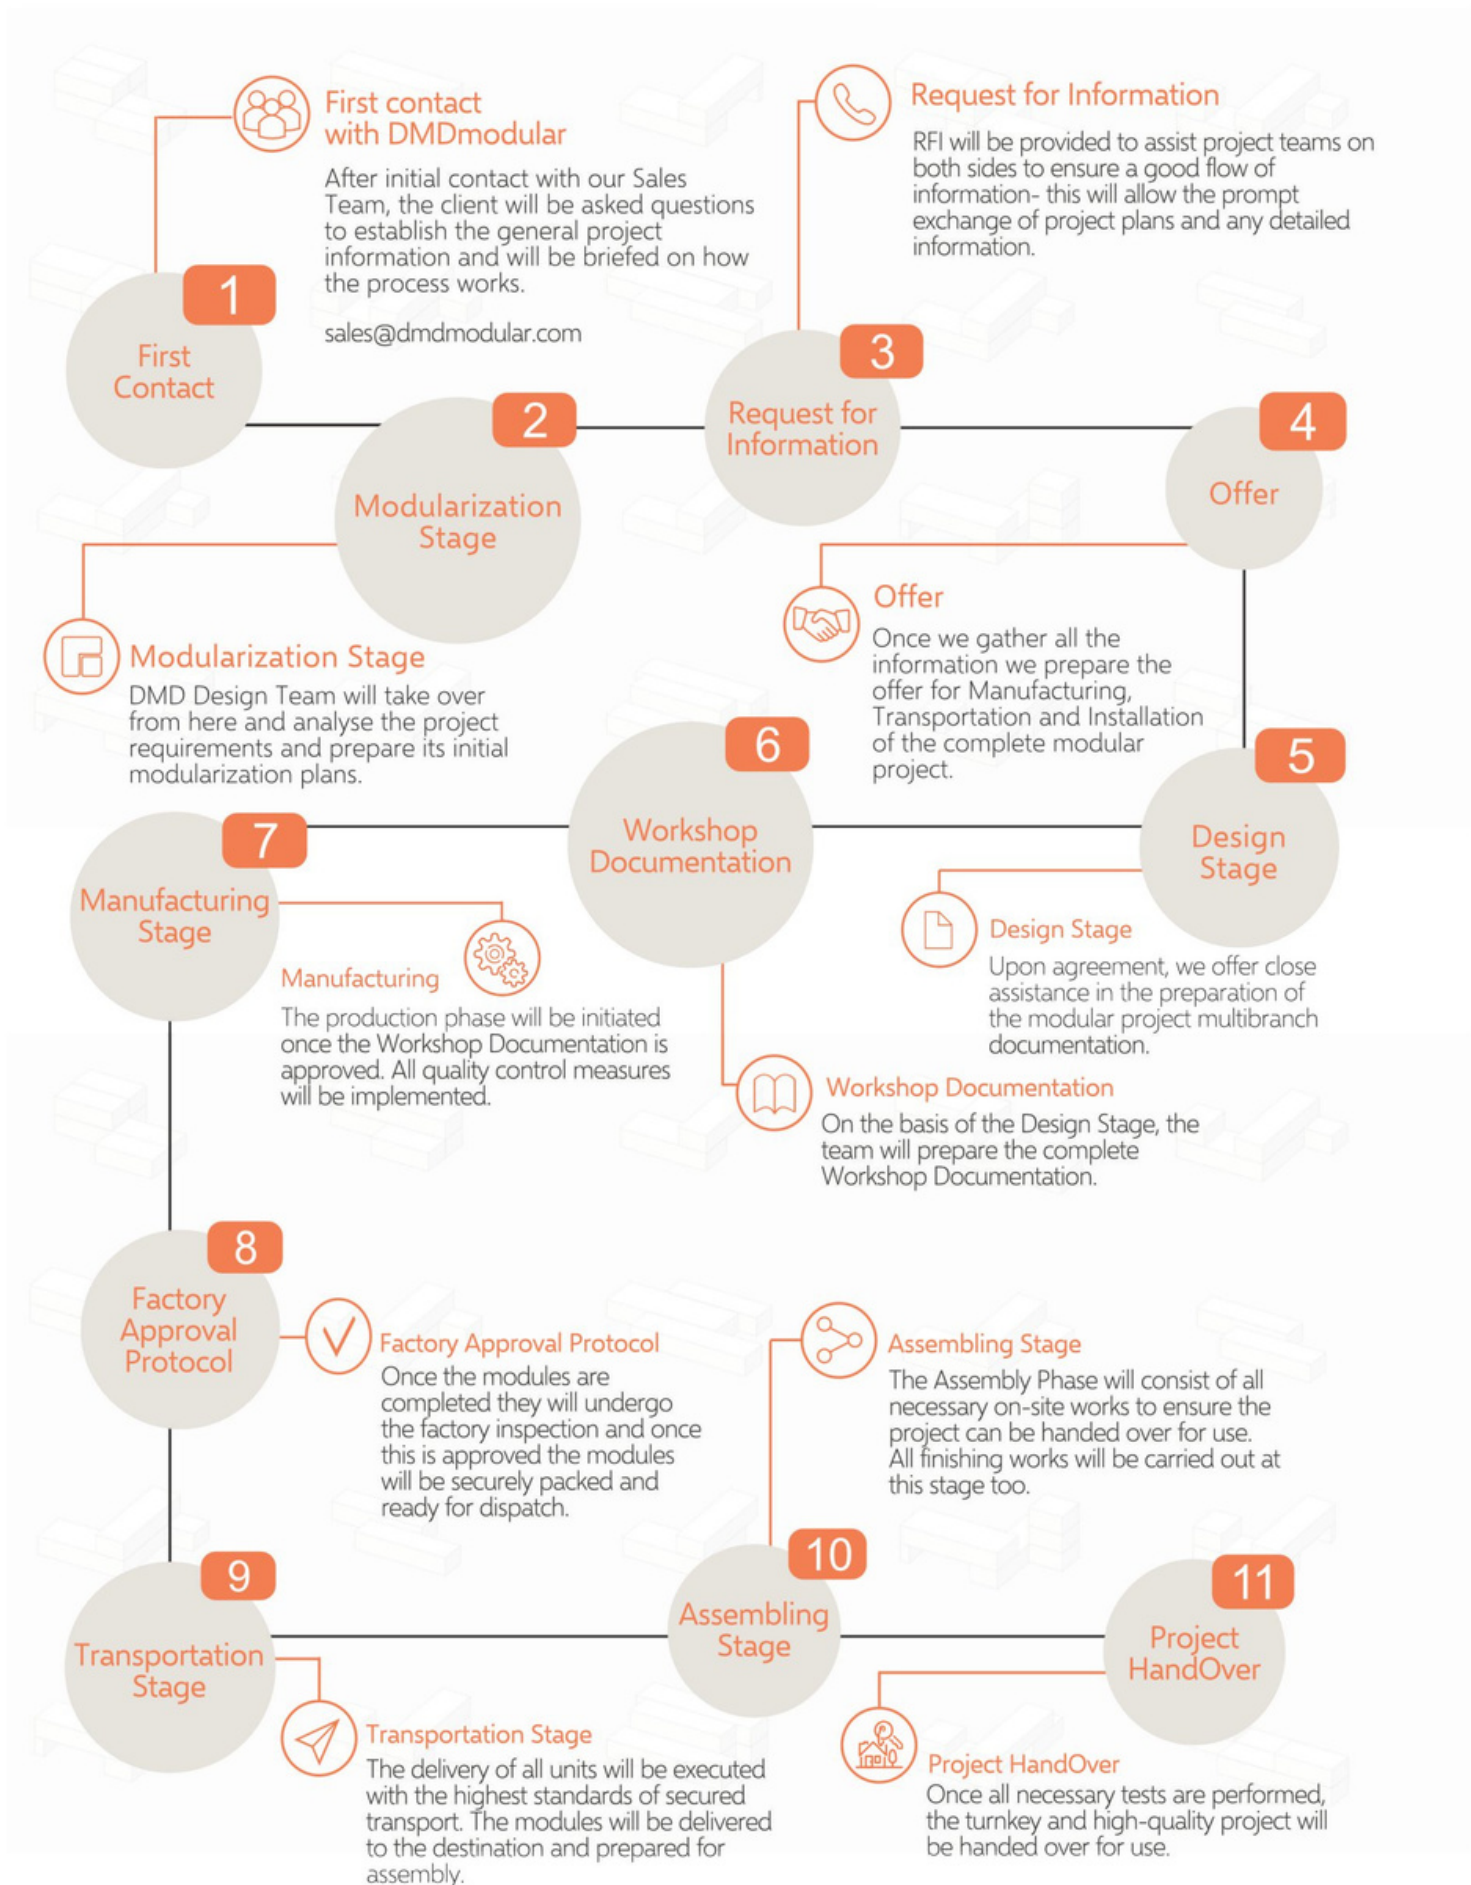

Our aim is to provide volumetric modular solutions where **technology, quality and aesthetics** integrate together.

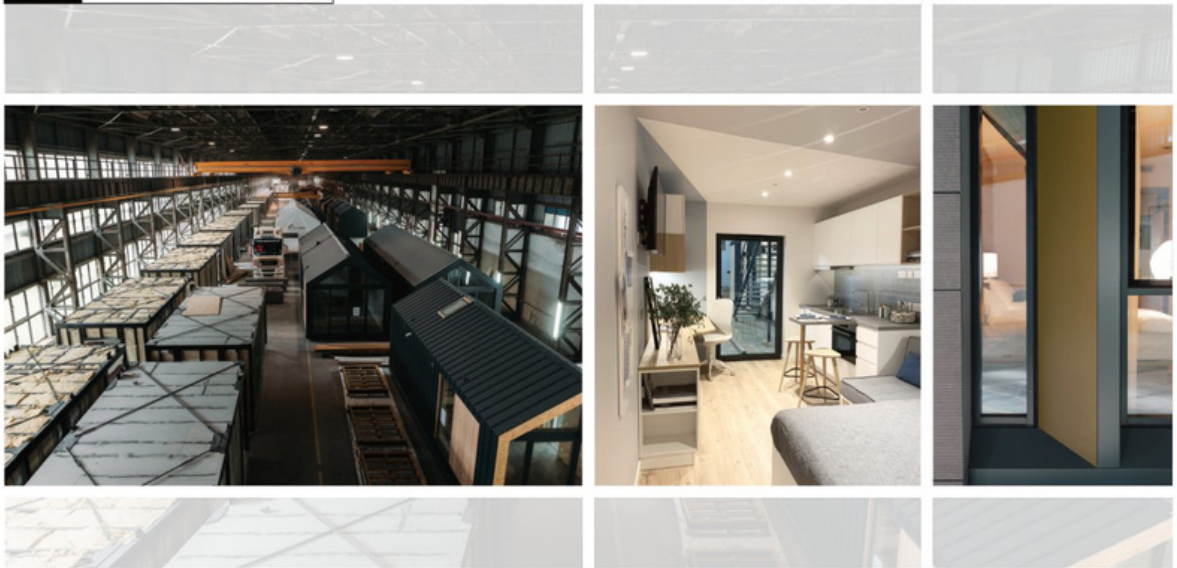

## Design

## Manufacture

## Delivery

# Why DMDmodular?

## **Quality backed by Skilled Production Teams & Products:**

DMD's modular buildings match or moreover often exceed the level of quality of conventional construction methods thanks to the expertise and practical approach of the onboard specialists.

## **Energy Efficiency & Sustainability in mind:**

DMD's modular system delivers efficient, high-performing buildings that allow developers to easily meet LEED, WELL, BREEAM or other building sustainability program metrics.

## **Time Savings impossible to compete with:**

DMD's volumetric modular system guarantees 30%-50% time savings compared to traditional construction methods.

## **Cost Optimization followed by Fixed Budget:**

DMD's modular technology is competitive in construction costs in relation to traditional technology buildings.

## **Flexibility and Adaptability of the process:**

DMD's technology provides high flexibility of architectural solutions providing unique design features as well as compliance with EU building requirements.

Design — Manufacture — Delivery
